1120 N STREET, SACRAMENTO

January 24, 1962

Honorable Edmund G. Brown, Governor
and Members of the Legislature of
the State of California

Gentlemen:

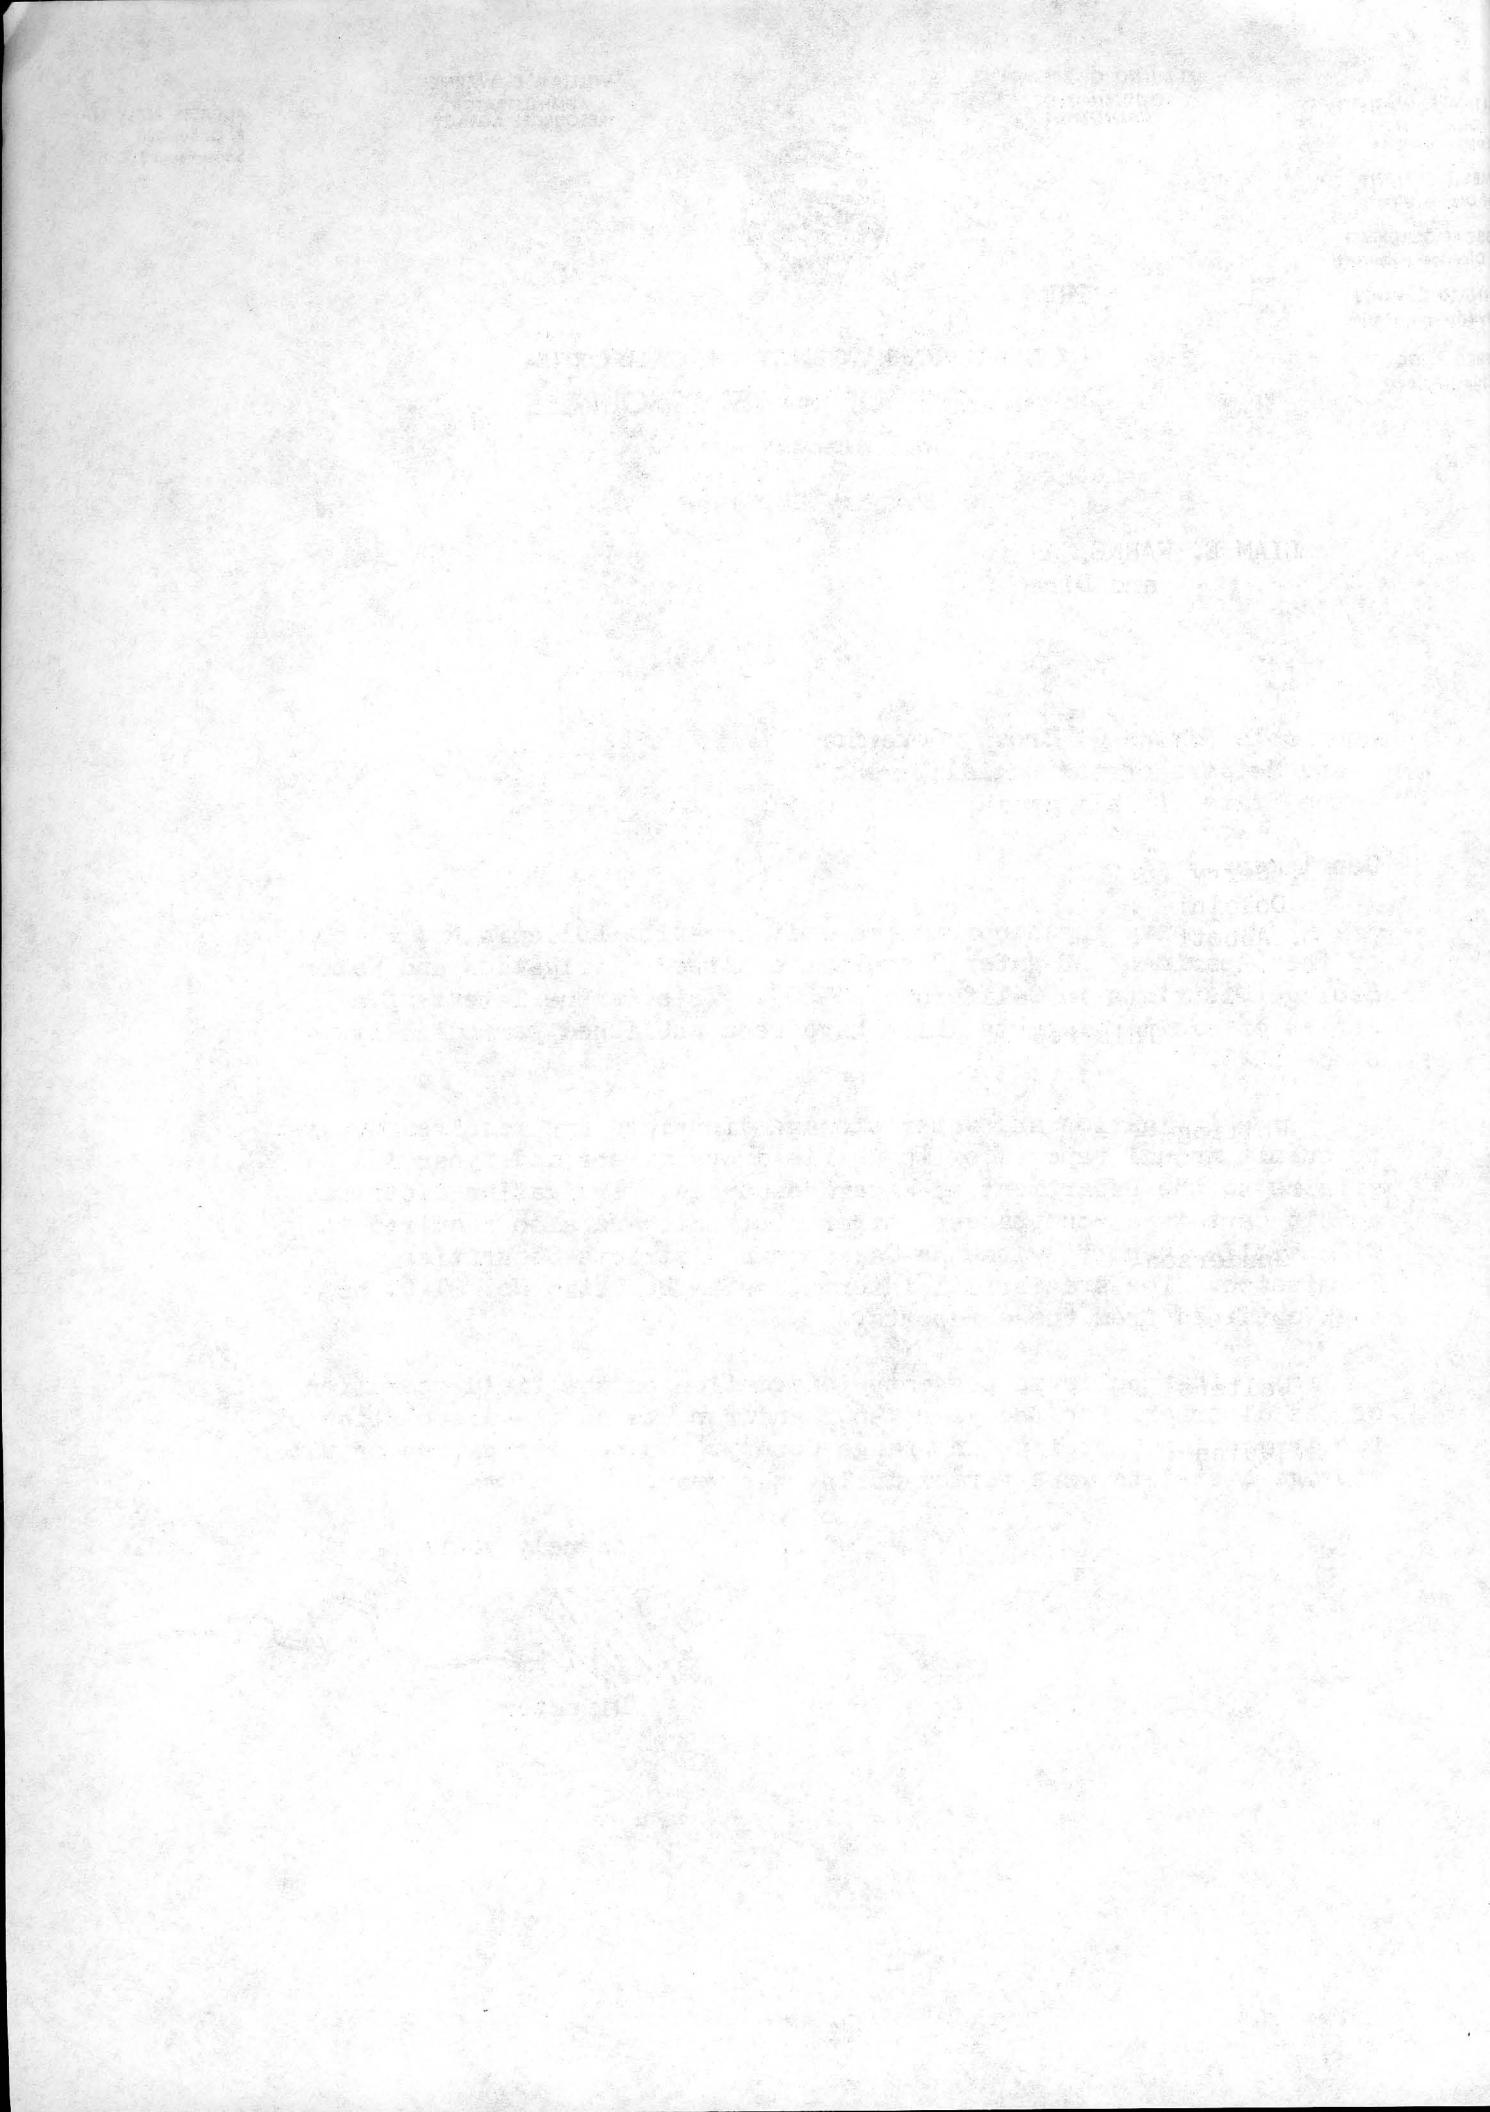

I have the honor to transmit herewith Bulletin No. 21-60 of the Department of Water Resources entitled "Irrigation and Water Storage Districts in California, 1960". This is the latest of a series of similar reports which have been published periodically since 1929.

Irrigation and water storage districts are required by law to submit annual reports of their field operations and financial affairs to the Department of Water Resources. Irrigation districts, and in certain circumstances, other districts are also required to file similar reports with the California Districts Securities Commission. The statistical information in Bulletin No. 21-60 has been obtained from these reports.

This bulletin presents information on the field operation of the districts for the year 1960, and reports on the dissolution of two irrigation districts in Orange County. No new irrigation or water storage districts were formed during the year.

Sincerely yours,

William E. Warne

SUMMARY

At the end of 1960 there were in the State 111 irrigation districts and 7 water storage districts, encompassing a total area of approximately 5,455,500 acres or 8,524 square miles. In 1960, the reporting districts diverted an estimated total of 13,247,000 acre-feet, of which approximately 7,401,000 acre-feet were delivered within the districts to irrigate some 2,429,000 acres of crops. Water deliveries within the districts for domestic, industrial, and municipal uses amounted to approximately 118,000 acre-feet.

There were no irrigation or water storage districts formed during 1960. The Newport Mesa and Newport Heights Irrigation Districts in Orange County were dissolved during the year.

A map showing the general location of existing California irrigation districts and water storage districts follows the tables of statistical data in this report.

TRINIDAD

the following list of which may give it some idea of the
various kinds of birds found there. Practically nothing is known of the
birds of the interior, and the following list may be considered
as being only a very small part of the total number of species
that may be found there. The list is based upon the records of the
various bird clubs and societies, and upon the publications of the
Government of Trinidad and the Royal Society for the Protection
of Birds, and upon the personal observations of the author.
The following list includes all the species of birds found in the
territory of Trinidad and the adjacent islands of the West Indies,
and also those which have been observed in the vicinity of the
coastal waters of the South American continent, and which
are likely to be found in the island of Trinidad. The list is
arranged in alphabetical order, and the names of the species
are given in full, with their scientific names, and the names
of the localities where they have been observed. The list
is not intended to be exhaustive, and it is probable that
there are many species which have not been observed
in the island of Trinidad, and which are likely to be found
there in the future. The list is based upon the records of
the various bird clubs and societies, and upon the publications
of the Government of Trinidad and the Royal Society for
the Protection of Birds, and upon the personal observations
of the author.

INTRODUCTION

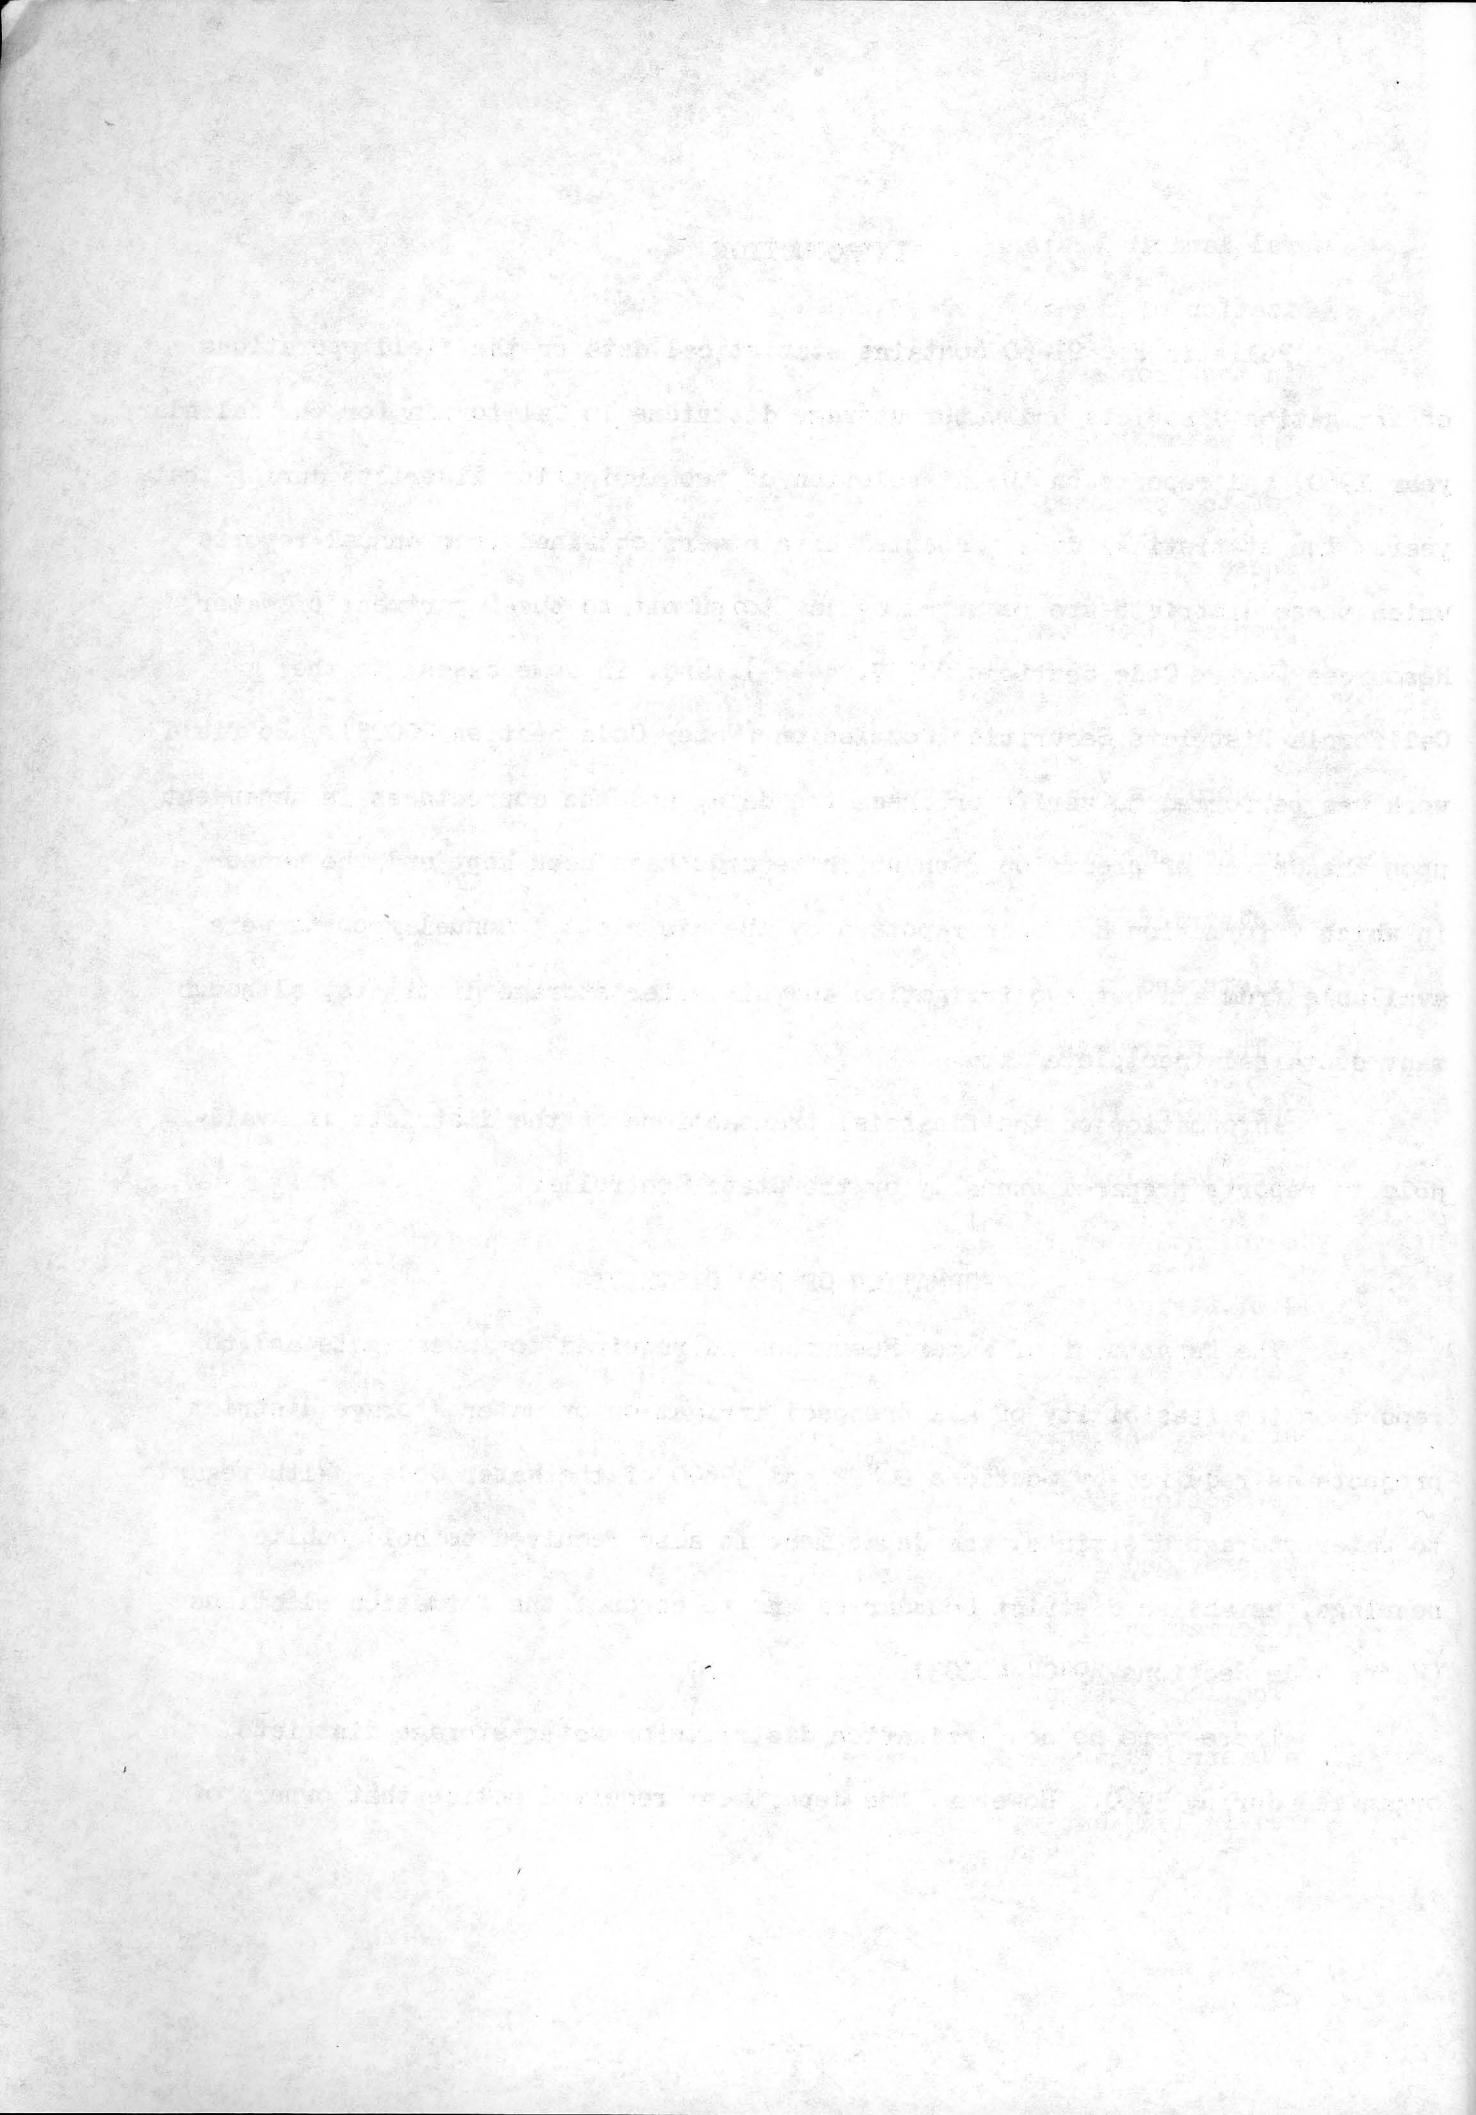

Bulletin No. 21-60 contains statistical data on the field operations of irrigation districts and water storage districts in California for the calendar year 1960, and reports on the dissolution of two irrigation districts during that year. The statistical data presented herein were obtained from annual reports which these districts are required by law to submit to the Department of Water Resources (Water Code Sections 22337, 44429), and, in some cases, to the California Districts Securities Commission (Water Code Section 20025). No field work was performed to verify or check the data, and the correctness is dependent upon the degree of precision with which records have been kept and the manner in which information has been reported by the districts. Annual reports were available from all but two irrigation and six water storage districts, although many contained incomplete data.

Information on the financial transactions of the districts is available in reports prepared annually by the State Controller.

FORMATION OF NEW DISTRICTS

The Department of Water Resources is required to investigate and to report on the feasibility of all proposed irrigation or water storage district projects as required by Sections 20822 and 39600 of the Water Code. With regard to water storage districts, the department is also required to hold public hearings, establish district boundaries and to conduct the formation elections (Water Code Sections 39400-40103).

There were no new irrigation districts or water storage districts organized during 1960. However, the department received notice that owners of

agricultural land in western Fresno and Kings Counties were proceeding toward the organization of the Westplains Water Storage District, and has since assisted in the proposed formation of that district in accordance with Section 39600 of the Water Code. Formation proceedings are also well underway in the formation of the proposed Belridge Water Storage District in Western Kern County. These districts propose the construction of works to distribute water from the proposed California Aqueduct to arid lands within the districts.

DISSOLUTION OF DISTRICTS

Records of the Department of Water Resources show that the Newport Mesa and the Newport Heights Irrigation Districts were dissolved in 1960, and that those districts were combined with the Fairway and Newport Mesa County Water Districts and the City of Costa Mesa to form the Costa Mesa County Water District. The districts were combined to eliminate duplication of water systems and to secure more efficient administration.

The dissolution of irrigation districts is generally accomplished by either the voluntary or the involuntary procedure set forth in Chapters 4 and 5 of Part 11 of Division 11 of the Water Code (Water Code Sections 27400-27758). However, because a general law was not found to be applicable, Chapter 1377, Statutes of 1959, was enacted to add Part 9.1 to Division 12 of the Water Code (Water Code Sections 33200-33250). This act, known as the Costa Mesa District Merger Law, provided for the dissolution of the older districts and for the merger and formation of the new district.

The locations of the dissolved Newport Mesa and Newport Heights Irrigation Districts are shown on the map at the back of this bulletin. The map was prepared in 1959 but was applicable for 1960 since there were no new districts

and a number of other countries have done likewise. In addition, the
United States has recently adopted a bill of rights for publications
which is a step in the direction of protection of journalists.
In Germany, there were 100,000 cases of libel suits in 1933.
These figures are probably much higher in Germany than in the United
States, because of the strict interpretation of libel laws by the
Courts. In the United States, the publication of newsworthy
material is protected by the First Amendment to the Constitution.
Under this amendment, freedom of speech and of the press
is guaranteed. This means that the press may publish any news
without fear of punishment. However, it does not mean that
newspapers may publish any news without responsibility. It
means that they must publish news that is true and accurate.
If a newspaper publishes false or inaccurate news, it may be
subject to legal action. In such cases, the newspaper may be
held responsible for damages caused by the false news.
However, it is important to note that the First Amendment
does not give the press complete freedom. It only protects
the press from being punished for publishing news that is
true and accurate. It does not protect the press from being
punished for publishing news that is false or inaccurate.
Therefore, it is important for journalists to be accurate
in their reporting. They should not publish news that is
false or inaccurate. They should also be careful not to publish
news that is likely to cause harm to others. They should
also be careful not to publish news that is likely to cause
harm to themselves. They should also be careful not to publish
news that is likely to cause harm to their employer. They
should also be careful not to publish news that is likely to cause
harm to their readers. They should also be careful not to publish
news that is likely to cause harm to their government. They
should also be careful not to publish news that is likely to cause
harm to their country. They should also be careful not to publish
news that is likely to cause harm to their world.

formed and the two dissolved districts are discussed. A brief description of the two dissolved districts follows.

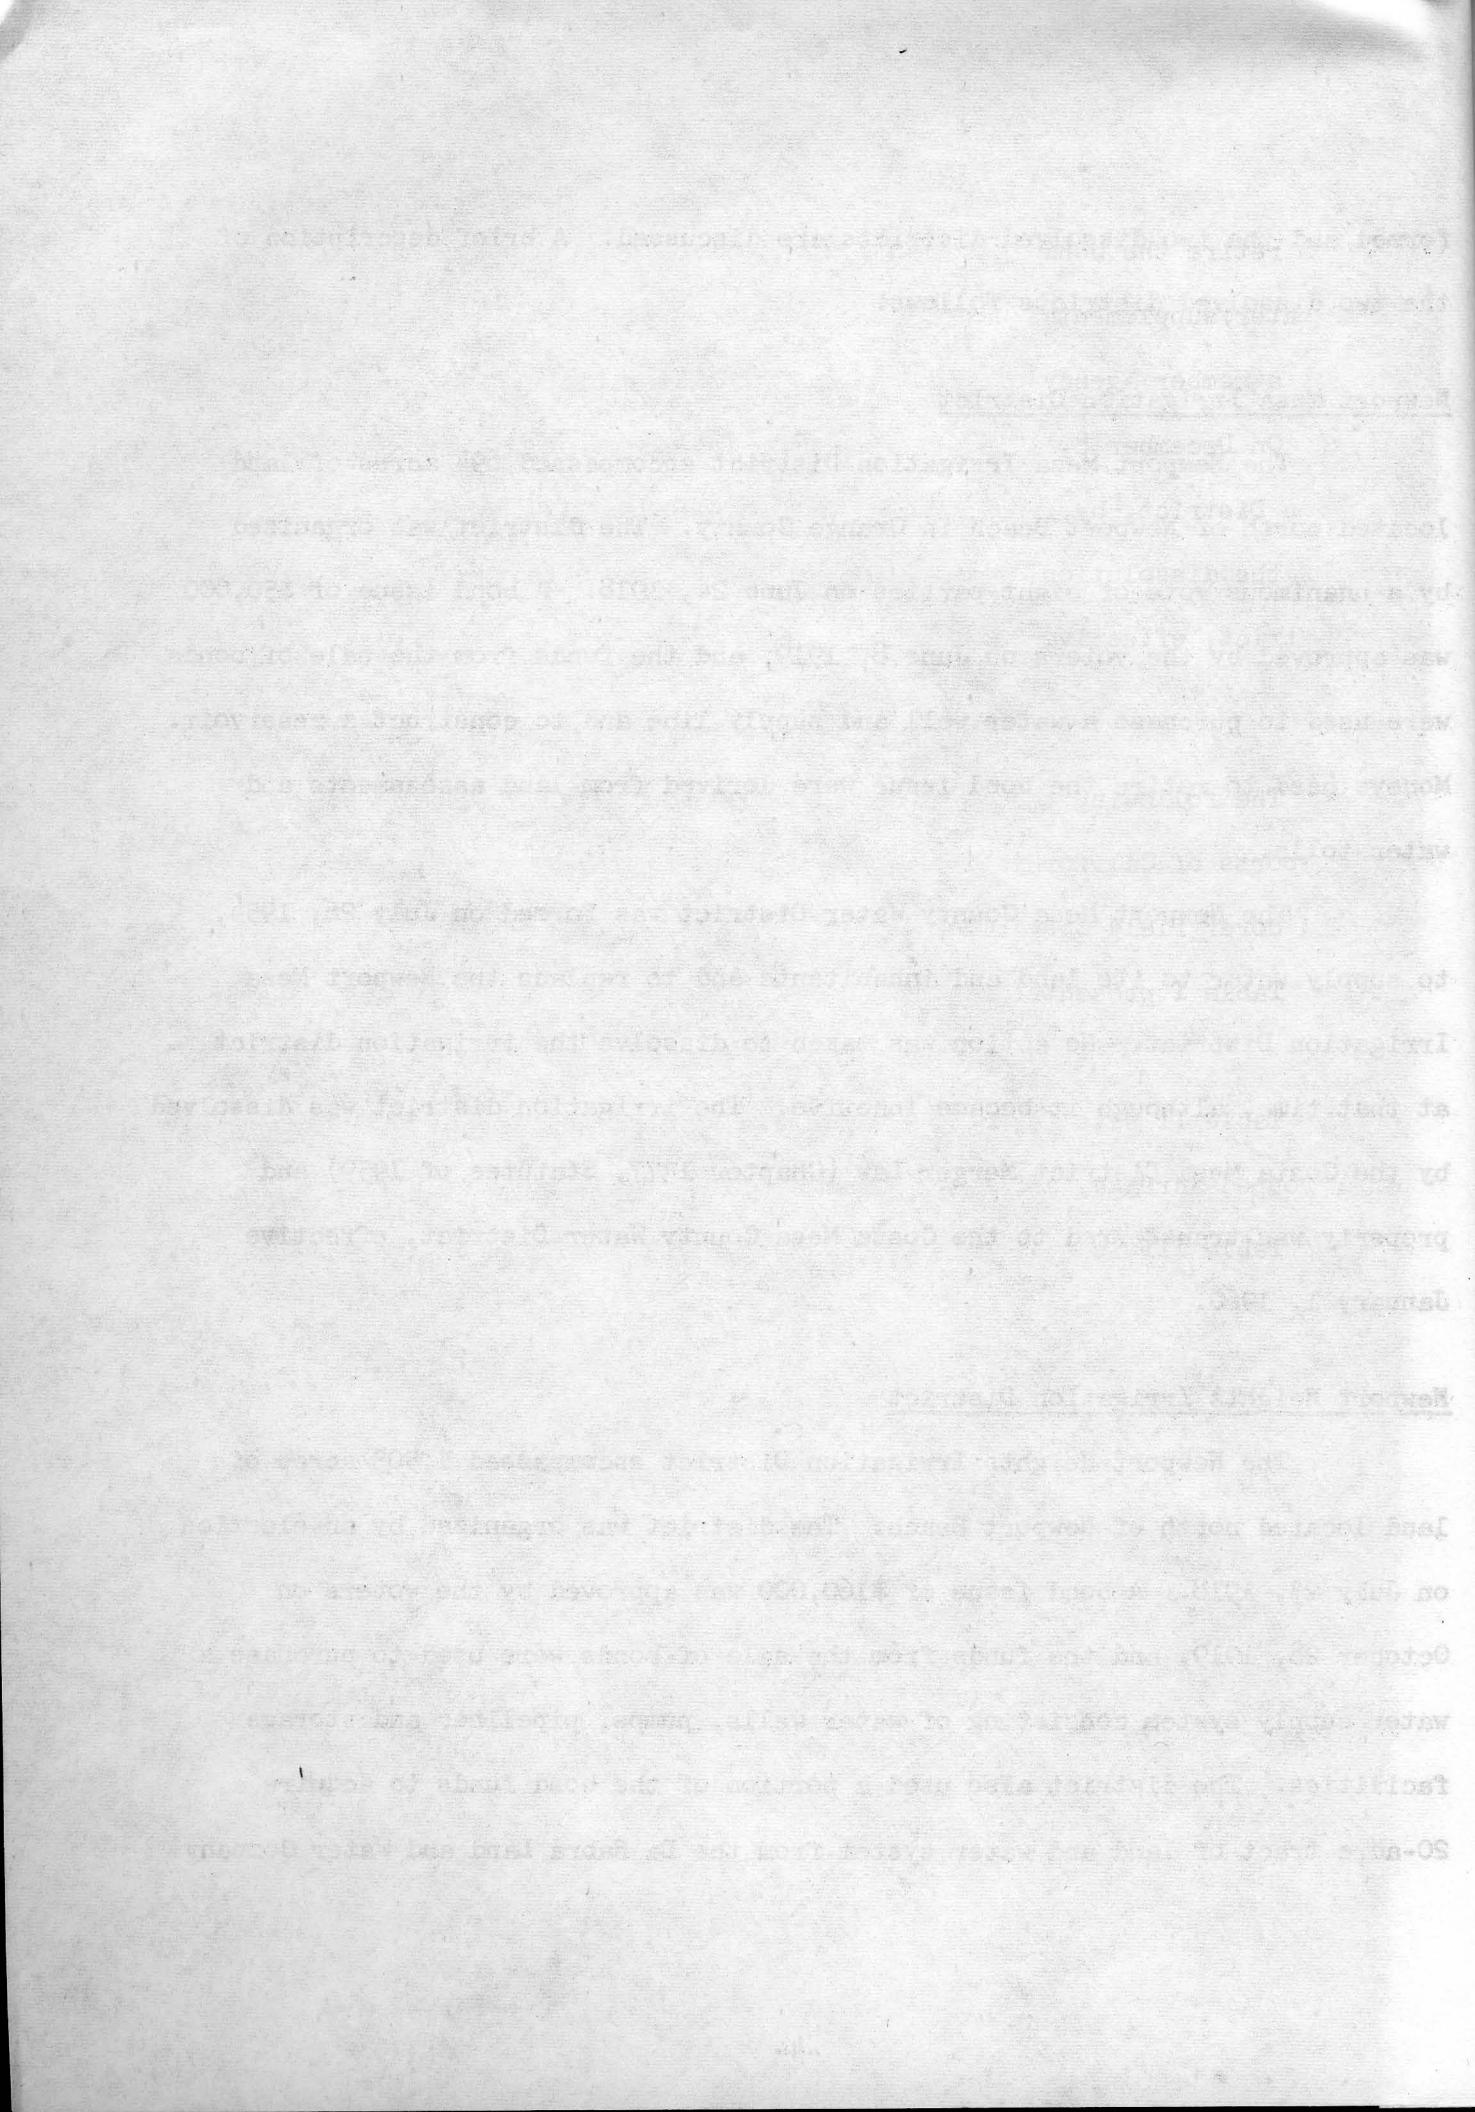

Newport Mesa Irrigation District

The Newport Mesa Irrigation District encompassed 694 acres of land located north of Newport Beach in Orange County. The district was organized by a unanimous vote of eight parties on June 24, 1918. A bond issue of \$50,000 was approved by the voters on June 8, 1919, and the funds from the sale of bonds were used to purchase a water well and supply line and to construct a reservoir. Moneys used to retire the bond issue were derived from land assessments and water tolls.

The Newport Mesa County Water District was formed on July 26, 1954, to supply water to its land and inhabitants and to replace the Newport Mesa Irrigation District. No action was taken to dissolve the irrigation district at that time, although it became inactive. The irrigation district was dissolved by the Costa Mesa District Merger Law (Chapter 1377, Statutes of 1959) and property was transferred to the Costa Mesa County Water District, effective January 1, 1960.

Newport Heights Irrigation District

The Newport Heights Irrigation District encompassed 1,503 acres of land located north of Newport Beach. The district was organized by an election on July 23, 1918. A bond issue of \$160,000 was approved by the voters on October 28, 1919, and the funds from the sale of bonds were used to purchase a water supply system consisting of water wells, pumps, pipelines and storage facilities. The district also used a portion of the bond funds to acquire a 20-acre tract of land and water system from the La Habra Land and Water Company.

Moneys to retire the bond issue were derived from land assessments and water tolls. Later, supplemental water was purchased from Coastal Municipal Water District, a member agency of The Metropolitan Water District of Southern California.

On December 8, 1959, the Board of Directors of the Newport Heights Irrigation District, by resolution, ratified Chapter 1377, Statutes of 1959, approving the dissolution of the district and merger with the Costa Mesa County Water District, effective January 1, 1960.

TABLES OF STATISTICAL DATA

The following tables contain statistical data obtained from the annual reports of California irrigation and water storage districts for the year 1960, and cover field operations.

Table I presents data on supply, storage, and distribution of water supplies.

Table II sets forth data on irrigated acreage, dry-farmed acreage, double-cropped acreage, and crops grown in the districts.

Table III is a directory of California irrigation and water storage districts.

(e) Estimate made by district, or based on data presented in annual report.

1/ Water obtained from the Delta-Mendota Canal of the C.V.P.

2/ District received water from the C.V.P. via the Delta-Mendota Canal in exchange for San Joaquin River water under terms of an "Exchange Contract" with the United States.

3/ Includes U. S. Bureau of Reclamation water delivered to Grasslands Water District.

4/ American River water obtained from the San Juan Suburban Water District.

5/ Water obtained from the Friant-Kern Canal of the C.V.P.

6/ District is not operational as it has not obtained a water supply.

7/ Water obtained from the Pacific Gas and Electric Co. and the Sly Park Project of the U. S. Bureau of Reclamation; amounts unsegregated.

8/ Water obtained from the Merced Irrigation District.

9/ Colorado River Water obtained from the San Diego County Water Authority.

10/ An unspecified and minor portion of this water was used for irrigation.

11/ The present function of this district is to percolate water diverted from the San Benito River and Tres Pinos and Dos Picascho Creeks to maintain ground water levels within the district. Pumping for irrigation is done on an individual basis.

12/ The district is proceeding wth plans to develop a water supply from the resources of Jackson Creek under provisions of Public Law 981, The Small Reclamation Projects Act of 1958.

13/ Mokelumne River water obtained from the East Bay Municipal Utility District.

14/ Colorado River water obtained from the Metropolitan Water District.

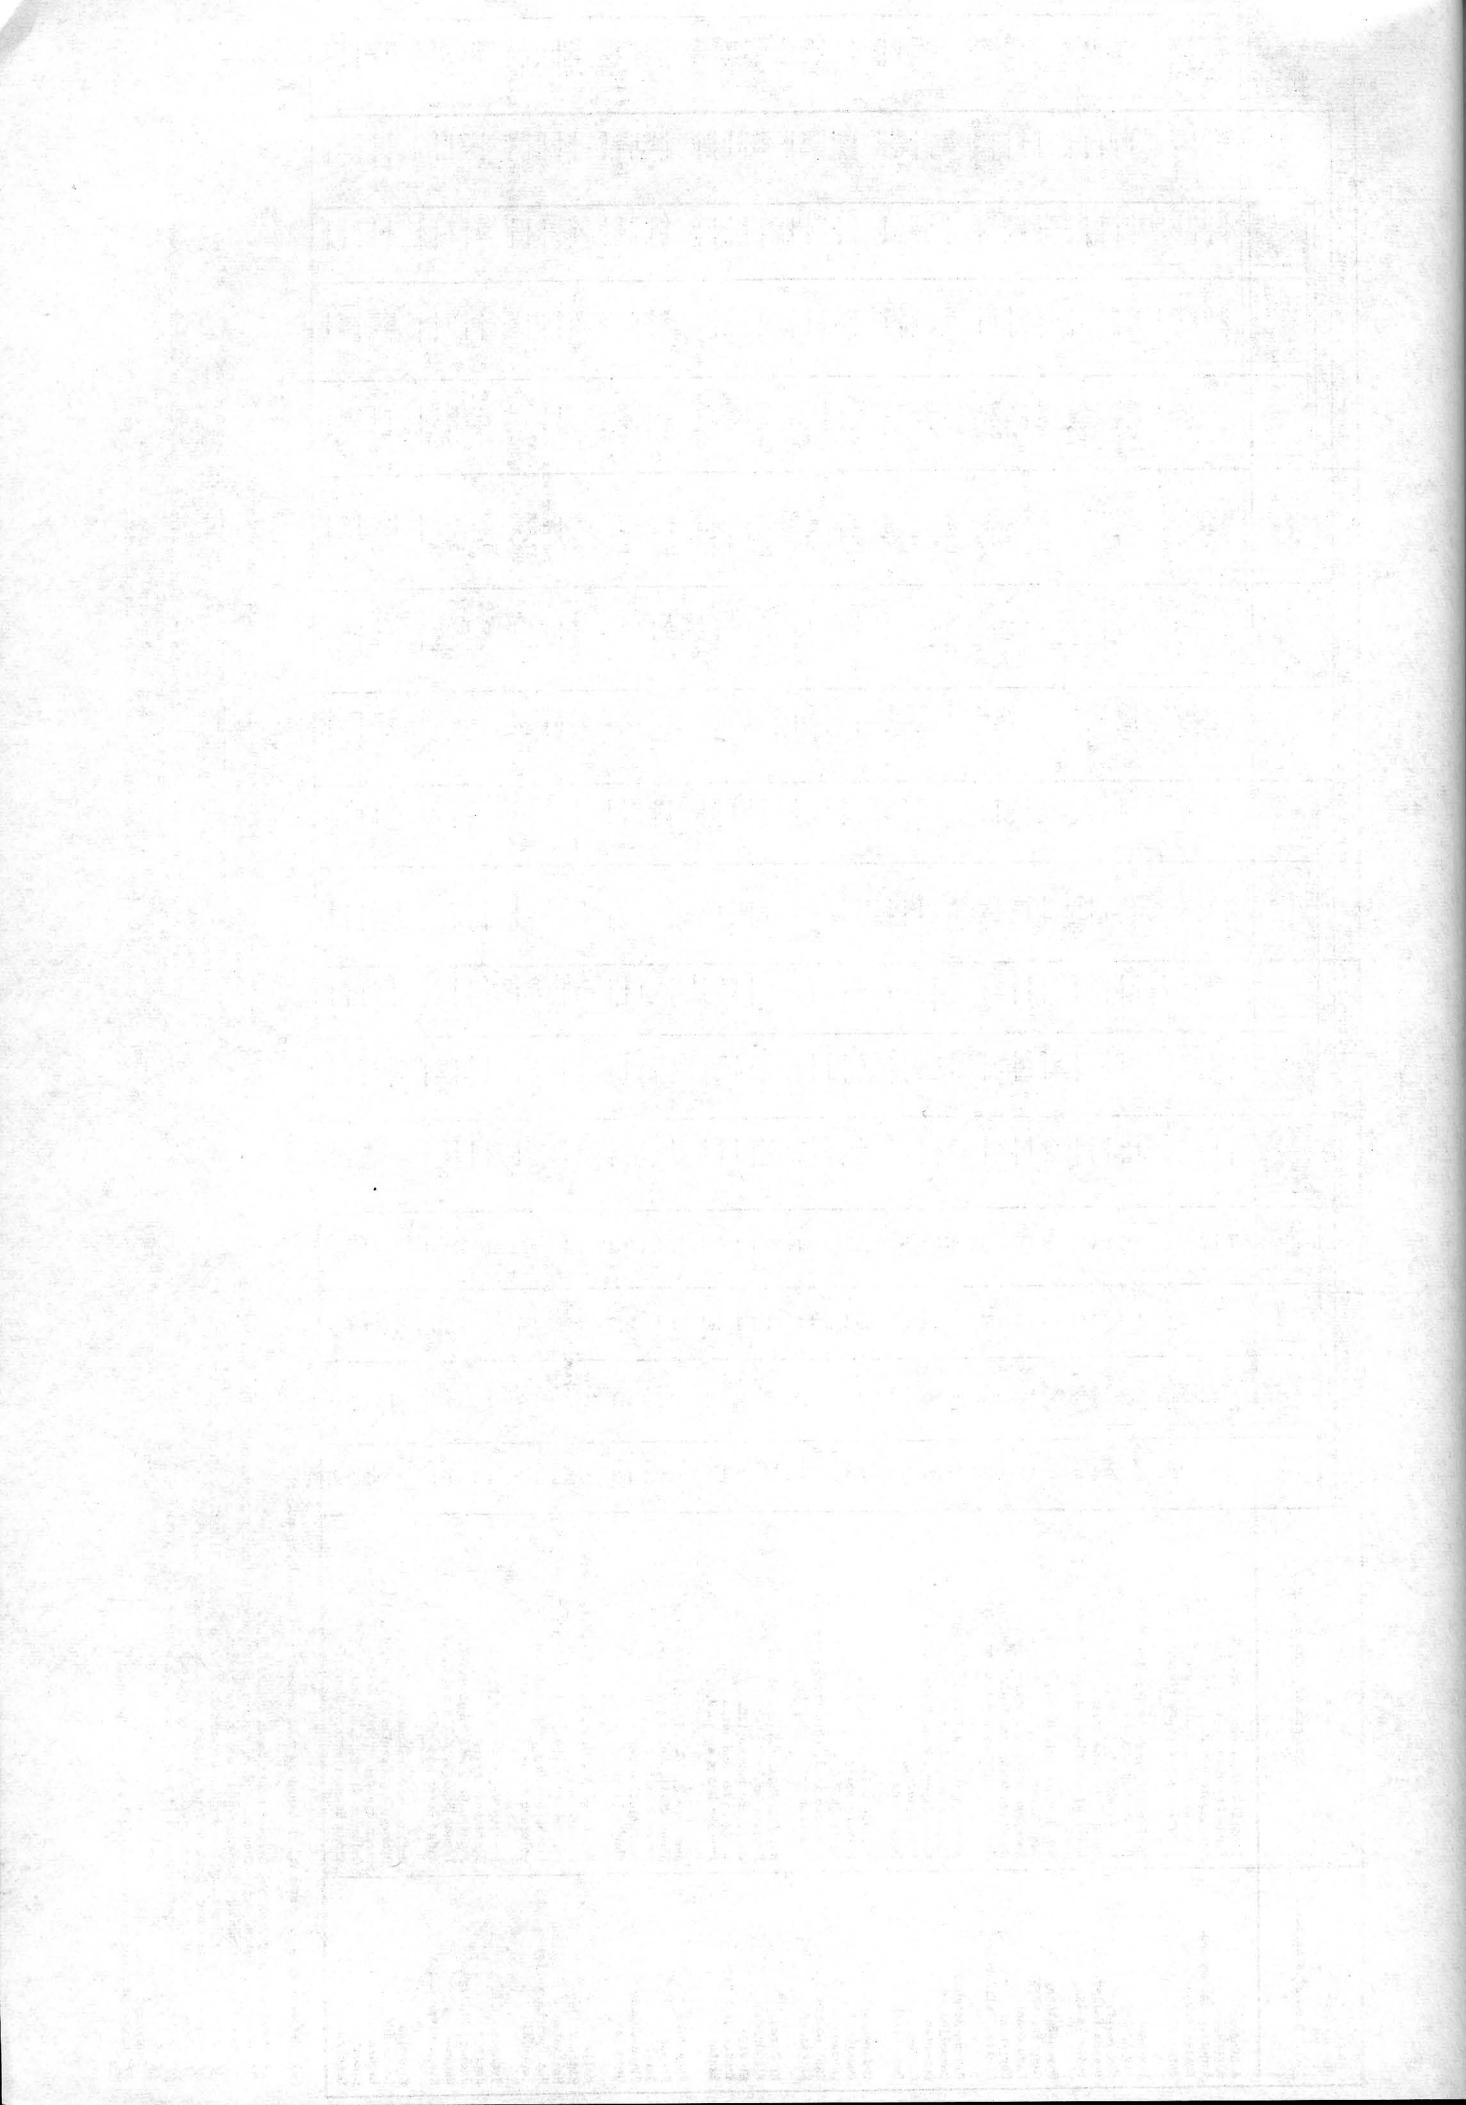

TABLE I (continued)
DATA RELATING TO SUPPLY, STORAGE AND DISTRIBUTION OF WATER AS REPORTED
BY CALIFORNIA IRRIGATION DISTRICTS

Calendar Year, 1960

| Name of district | Sources of water supply | District pumping units | | | | Reservoir Storage, in acre-feet | | | Water diverted by district, in acre-feet | | | | | Water reported delivered, in acre-feet | | | | Water lost and/or spilled, in acre-feet | | | | |
|--------------------------------|--|------------------------|-----------------------|--------|-----------------------|--|------------------------------|---------------|--|-------------------------------|-------------------------------|-----------------------|-----------------------|--|-----------------------|----------------|------------------------|---|----------------------------|------------------|--------|-----|

(e) Estimate made by district or based on data presented in annual report

^{5/} Water obtained from the Friant-Kern Canal of the C.V.P.

^{10/} An unspecified and minor portion of this water was used for irrigation.

^{11/} Colorado River water obtained from the Metropolitan Water District.

^{15/} The Linden Irrigation District has leased its facilities to the Stockton-East San Joaquin Water Conservation District.

^{16/} Water obtained from the Putah South Canal of the Solano Project.

^{17/} Water obtained from the Madera Canal of the C.V.P.

^{18/} Includes an estimated 2,000 acre-feet delivered to duck clubs.

^{19/} Data presented is for irrigation operation only.

^{20/} Includes water pumped from other than wells.

^{21/} Includes foothill reservoir losses.

^{22/} The present motive of this district is to protect its water rights to Mokelumne River water and to provide flood control for its land owners. Irrigation within the district is accomplished on an individual basis.

^{23/} Water obtained from Pacific Gas and Electric Company.

^{25/} Includes 522,100 acre-feet of drainage water and canal seep returned to Colorado River.

^{26/} District has not yet obtained a dependable water supply; approximately 75,000 acre-feet of water were pumped within the district from privately owned and operated wells.

^{27/} Water obtained from the Glenn-Colusa Irrigation District.

^{28/} Water obtained from the Ramona Municipal Water District.

^{29/} Water obtained from the City of San Diego and the San Diego County Water Authority.

^{30/} Water from the Pine Flat Project obtained through the Lemoore Canal and Irrigation Company.

| | New district: formation election was held on August 11, 1959. | | | | | | | | | | | | | | | | | |

(e) Estimate made by district, or based on data presented in annual report.

^{1/} Water obtained from the Delta-Mendota Canal of the C.V.P.

^{2/} District receives water from the C.V.P. via the Delta-Mendota Canal under terms of an "Exchange Contract" with the United States.

^{3/} Water obtained from the Friant-Kern Canal of the C.V.P.

^{4/} Colorado River water obtained from the San Diego County Water Authority.

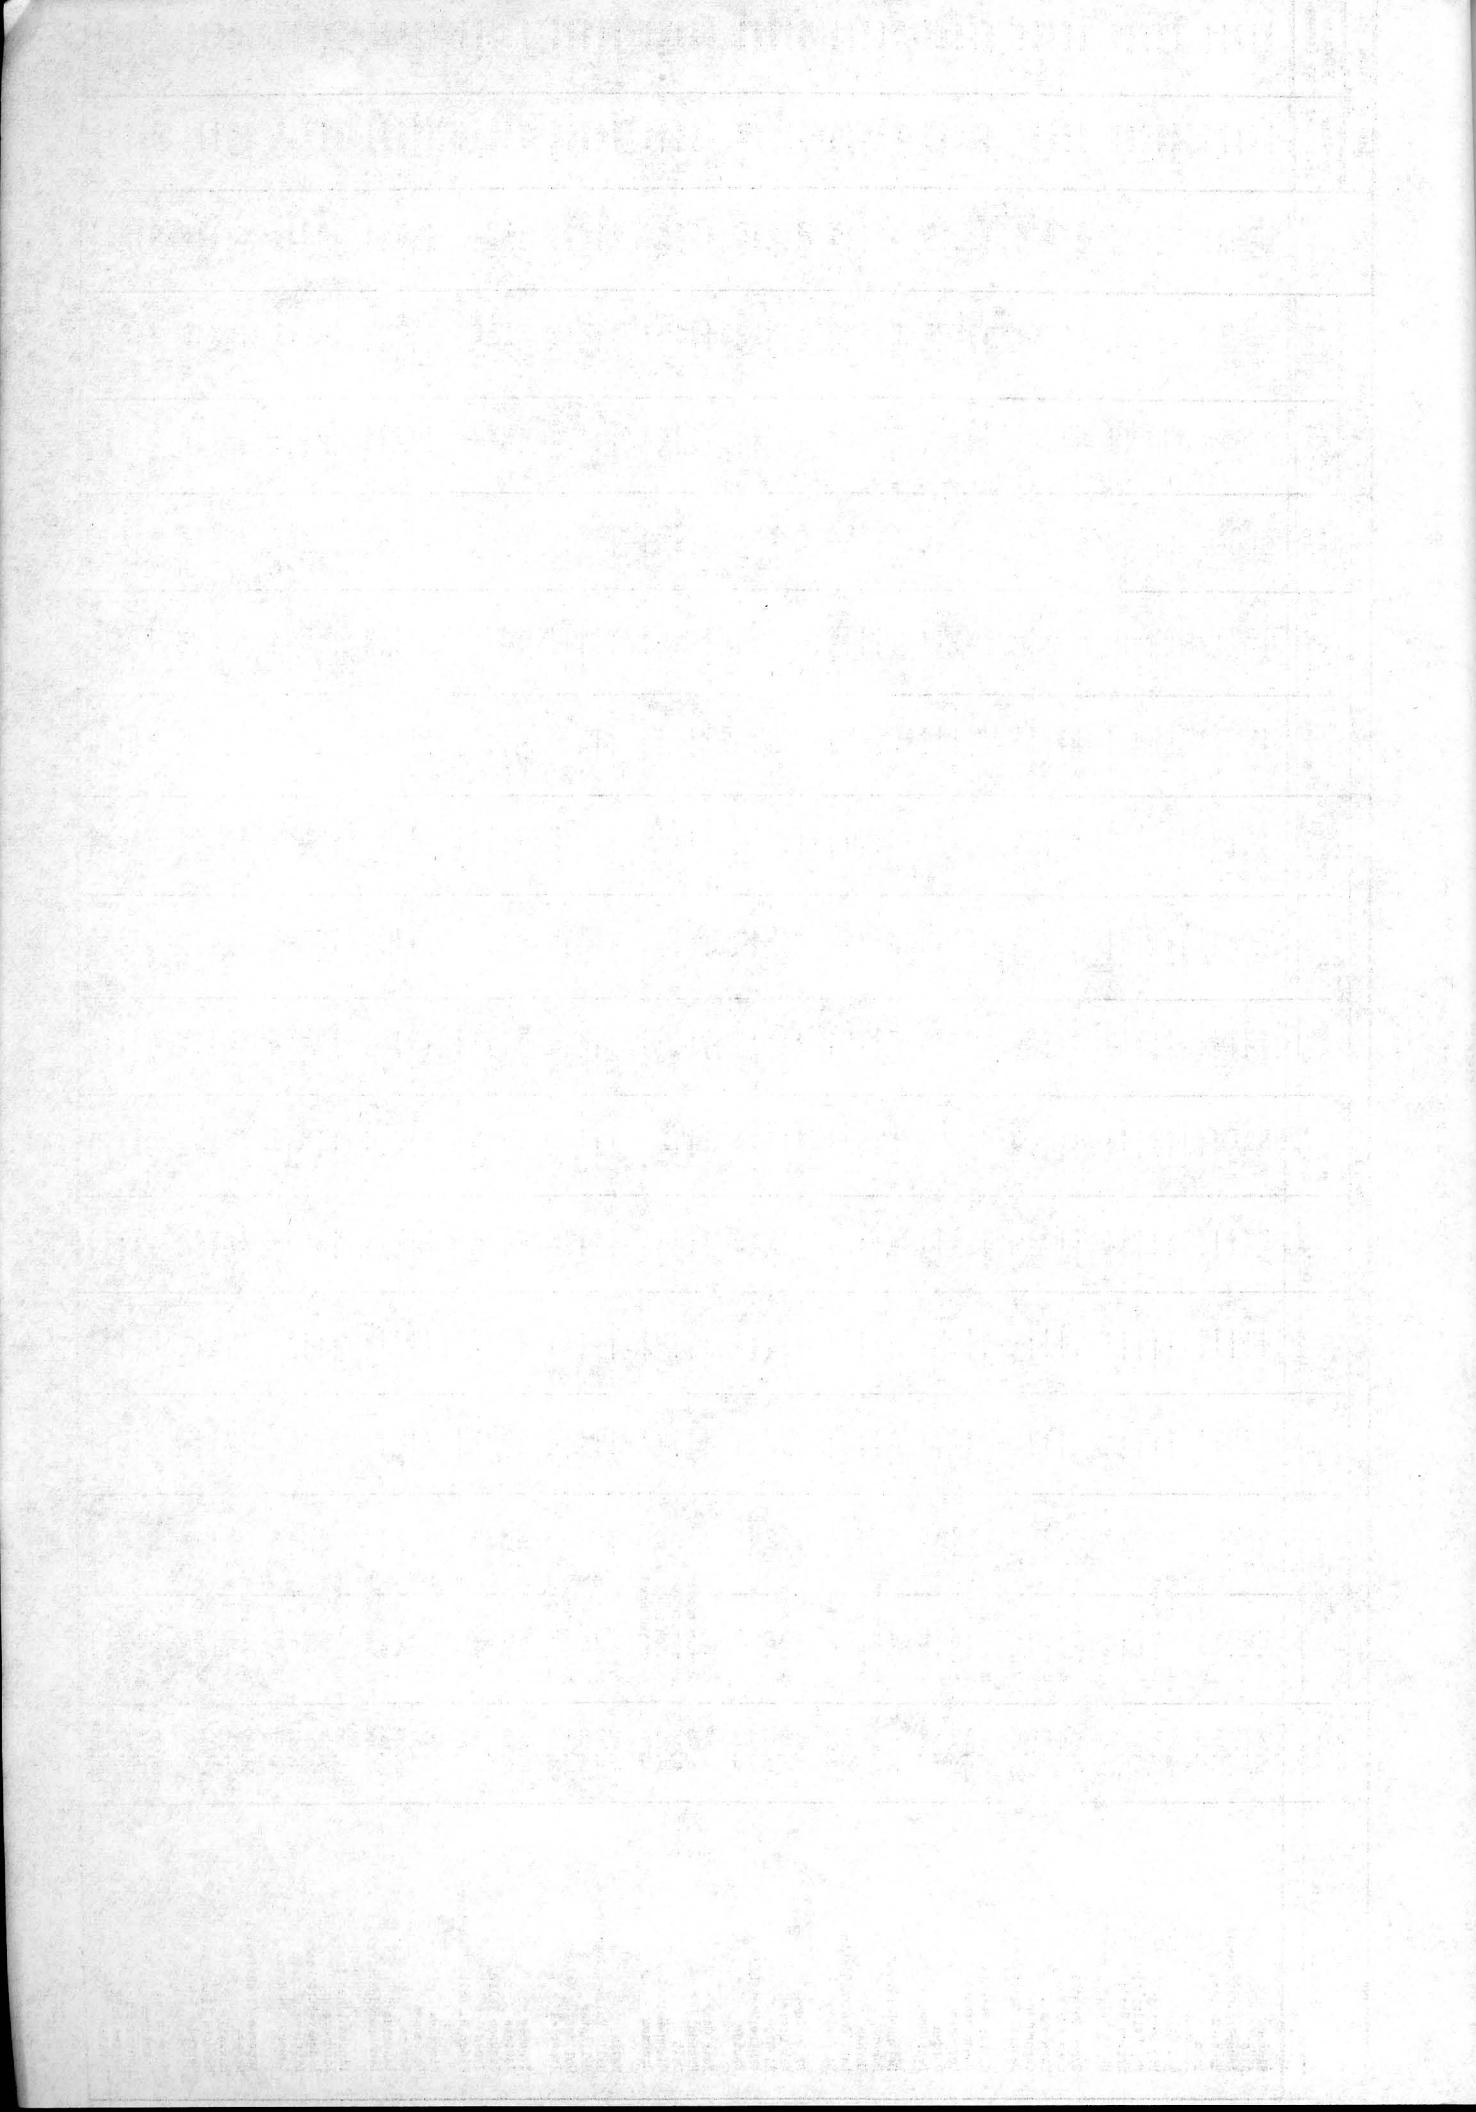

³¹ Water obtained from the Pacific Gas & Electric Co., delivered by the California Water Service Co.

³² The Tule Irrigation District is attempting to gain release from bankruptcy and obtain necessary water rights in order to reactivate and prepare for the acquisition of a water supply from Eagle Lake by the rehabilitation of the old system once jointly owned by the district and the former Baxter Creek Irrigation District.
